

European Chemical start-ups take off www.chemstart.org Your online database for chemical start-ups in Europe

ORGANIZERS

■ DECHEMA e. V.

DECHEMA, the Society for Chemical Engineering and Biotechnology, is a non-profit making scientific and technical society based in Frankfurt on Main. It was founded in 1926. Today DECHEMA has over 5,000 private and institutional members. DECHEMA's aim is to promote research and technical progress in chemical engineering, biotechnology and environmental protection.

■ PlasticsEurope Deutschland e. V.

PlasticsEurope in Brussels is the new pan-European association of plastics manufacturers. Frankfurt on Main is the seat of PlasticsEurope's Region Central Europe which comprises Germany, Austria, Switzerland and the new EU member states in Central Europe.

■ VERBAND DER CHEMISCHEN INDUSTRIE e. V.

VCI (Verband der Chemischen Industrie e. V.), the German chemical industry association, represents the political interests of 1,600 German chemical companies and German subsidiaries of foreign groups in contacts with politicians, public authorities, other industries, scientists and the media. VCI speaks for over 90 % of the German chemical industry. The association is headquartered in Frankfurt on Main, with an office for liaising with the German parliament and the federal government in Berlin and a liaison office in Brussels.

CHEMSTART.ORG – YOUR WEB BASED COMPANY DATABASE

Chemstart.org, the web based company database, is established in order to give start-ups a high visibility among customers, cooperation partners and investors, driven by DECHEMA, PlasticsEurope and VCI.

The database presents the profiles of chemical start-up companies in Europe which are active in different fields of chemistry, polymer science and technology and nano-chemistry.

Research intensive start-ups are an increasingly valuable element of the value chain. They transform scientific knowledge fast and successfully into innovative products and processes. DECHEMA, PlasticsEurope and VCI have the common goal to support the setting up and the growth of research intensive start-up companies in chemistry and material sciences in Europe.

CLASSIFICATION

Classification is done by selected key words grouped as follows:

- **Polymer Materials**
Thermoplastics, thermosets, elastomers, specialty polymers, functional polymers, biopolymers
- **Inorganic Materials**
- **Nanoparticles**
Nanostructured materials, nanotubes, coated nanoparticles, dendrimers, nanowires
- **Fine / Specialty Chemicals**
- **Catalysts**
Homogeneous catalysts, heterogeneous catalysts, biocatalysts
- **Polymer Applications**
Additives, dispersions, compounds, surface coatings
- **Inorganic Applications**
Additives, dispersions, compounds, surface coatings
- **Process Engineering**
- **White Biotech**
Enzymes, fermentation, biopolymers, biomass
- **Materials Testing / Analytics**
- **Surface Technologies**
- **Contract R&D**
- **Materials Combinations**
Knowledge based multifunctional materials and hybrid materials, composites

REGISTRATION

Why should you register your company?

The database www.chemstart.org is a networking platform and provides a high visibility among:

- Customers
- Cooperation Partners
- Investors

Registration services are free of charge.

How to submit your company profile?

To submit your company profile, go to the website www.chemstart.org and download the files „submit.doc“ or „submit.pdf“. Fill in the requested information and e-mail or fax the document to DECHEMA.

DECHEMA, PlasticsEurope and VCI reserve the right to accept or refuse the registration of submitted profiles.
